EDUCATION

Stevens Institute of Technology

M.S. Computer Engineering

Hoboken, NJ

Sep 2024 - May 2025

Stevens Institute of Technology

B.S. Computer Engineering

Hoboken, NJ

Sep 2021 - May 2024

EXPERIENCE

Jefferies Group LLC

Software Engineer

Jersey City, NJ

May 2025 - Present

- Consolidating and automating data pipelines for finance and HR data from Oracle Peoplesoft to Snowflake using Claude Code and Snowflake Openflow.

The Evaluation Company

Software Engineer

New York, NY

Apr 2025 - May 2026

- Built **LLM-powered document-processing pipelines** integrated with **Salesforce** and **AWS EC2**, automating transcript evaluation and data extraction for 200+ daily cases and reducing vendor costs by **\$93K/month**.
- Deployed **AWS CDK** infrastructure for a multi-access portal; implemented **CI/CD**, **RDS**, **S3**, **ElastiCache**, and **ECS/App Runner** with full networking and security configuration.
- Built **FastAPI** backend with **SQLAlchemy ORM** and async task processing via **ARQ** and **Redis** for multi-LLM document classification and PDF generation workflows.

Colgate-Palmolive

Software Engineering Intern

Piscataway, NJ

Jun 2024 - Mar 2025

- Developed shopping cart and mini-cart components in **AngularJS** and **TypeScript**, resolving **25+ Jira** tickets and improving UX across desktop and mobile.

PROJECTS

Resume Editor | [cura-resume.vercel.app](#)

- Built an **AI-powered resume tailoring platform** using **Next.js**, **TypeScript**, and **Claude API**; architected multi-tenant **Supabase** backend with Row-Level Security, **TanStack Query**, and **Zustand** state management.
- Developed interactive resume editor with live preview, inline AI suggestions, and **Claude Vision** PDF parsing to automate job description analysis and resume customization.

Alpaca Trading Agent | [github.com/juchen3637/AlpacaTradingAgent](#)

- Built an **end-to-end algorithmic trading system** in **Python** with the **Alpaca REST/WebSocket API** for real-time order management; deployed on **AWS EC2** as a persistent systemd service with a **Dash** monitoring dashboard.
- Implemented an **agentic CI/CD pipeline** using **Claude Code** in rootless **Podman** containers with autonomous PR creation via **Telegram** — zero manual SSH access required.

Prediction Market Bot | [github.com/juchen3637/predict-market-bot](#)

- Built an **automated prediction market trading system** scanning **Kalshi** and **Polymarket**, using a multi-LLM ensemble (**Anthropic**, **OpenAI**, **Gemini**) and XGBoost with Kelly criterion position sizing.
- Deployed **microservices pipeline** on **AWS EC2** with **Prometheus/Grafana** observability; implemented Brier score tracking and 80/20 backtesting on 500+ resolved markets for continuous XGBoost retraining.

SKILLS

Languages: Python, JavaScript, TypeScript, C++, Java, SQL

Frameworks and Libraries: React.js, Node.js, Express.js, Angular, Next.js

Developer Tools: PostgreSQL, Git, AWS, Docker, CI/CD
